

Dear sirs, I am an ardent listener to Satellite radio -- XM to be exact. I really enjoy listening to XM Satellite Radio and its traffic and weather channels. To me, satellite radio provides variety and quality that are not available elsewhere. For this reason, I am willing to pay for these services. It is my choice and my right. I want Satellite radio to be able to expand and compete and not be constrained by unnecessary regulations so other forms of radio can survive.

I strongly believe that it should not be up to the National Association of Broadcasters to dictate what we are permitted to hear. Would you please carefully consider the impact and then push to reject the NAB's petition 04-160 and support satellite radio and XM's ability to provide the kind of programming that I want, demand, and deserve.
